

Wireless Presenter

Datasheet

- > Equip your meeting room with reliable technology to make your meetings more efficient.
- > Share your documents on an LED screen at a touch of a button.
- > Wireless switching from one presenter to the next or even letting two people share content simultaneously is no problem anymore.

We at Toshiba believe that the most successful organisations are those which communicate information in the most efficient way. Professional products all aim at helping you achieve this goal. One way is to use state-of-the-art technology during meetings.

How often have your meetings started late, because cables were missing, the connectors did not match or devices were not compatible with each other? This is now a thing of the past: Toshiba offers you a package which adds value to your meeting room - for customers and colleagues.

Professional LED displays - available as 43", 55" and 65" screens - offer superior image quality to make sure your message is seen by every one in the room. Add the wireless presenter solution ClickShare CSE-200¹⁾ to this and the efficiency of your meetings will increase even more. It allows anyone - even external visitors - to connect via a USB-powered device and present their content from their laptop on your screen. The apps, available for Android and iOS, even allow the use of tablets and smartphones to share information; if needed, even two people simultaneously.

Enjoy the full service from consulting and configuring your system to delivery and even installation - all from one hand.

¹⁾ClickShare is produced by Barco
